~~Sept.~~

Dear Harold

In a lull before the plane departs I write to inform you the tablet stones came & in perfect shape, moist, green and ready. They arrived at 9:00 a.m. ~~this~~ Wednesday the 30th. I planted them immediately and we water the Spring. One plant I put in ~~good~~ sandy soil to see if it "worked" there, I surely prepared soil of course.

Yesterday also I received a phone call & a fax from Oregon Mountain Energy asking me to work them (for pay) as history consultant in a Bureau of Indian Affairs suit ~~against~~ for the Menominee against the local power company. The power company has a dam at the edge of the reservation.

Since I am with the Men. in a suit against the B.I.A. it seems like a conflict. But I am burdened by too much work already & will decline

I trust Lil's health continues to improve.

Love
Daniel
